Satellite event to the Trilateral AI Conference 2024
"Generative AI: Pathways to Democratization, Transparency and Sustainability"

International Symposium on Ethics in Information Technology and Robotics

The rapid global advancement in information and communication technologies including AI impacts societies beyond borders. To enable responsible and ethical implementation of new technologies on a global level, international exchange and cooperation are crucial.

At a satellite symposium to the German-Japanese-French conference on "Generative AI: Pathways to Democratization, Transparency and Sustainability" two experts from Germany and Japan will introduce and discuss approaches toward the ethical use of AI.

Organizer(s)	Deutsche Forschungsgemeinschaft (DFG, German Research Foundation), Deutsches Wissenschafts- und Innovationshaus Tokyo (DWIH Tokyo, German Centre for Research and Innovation Tokyo), Center for Applied Philosophy and Ethics (CAPE), Kyoto University
